

C-10/12 WATERLINES

Shown in a standard C-TLU

Cross Tool incorporates waterlines into the manufacturing process saving you time and money. Your choices include gun-drilled holes for waterlines, or cartridge heating elements. With a simple layout drawing or sketch we can provide a competitive quote. Threaded holes can be added for a nominal extra fee.

All C-TLU'S can be modified in length and width to accommodate cams or waterlines. Leader Pin locations can be moved. 2 more Leader Pins and Bushings can be added for an additional cost. All ear-plate and ejector locations will stay the same. All guided ejection and return pins options are available. (see Page 22)
